

Electric Power Transmission Plants and the Use of Electricity in Mining: Written for the Twelfth Report of the State Mineralogist, 1894 (Classic Reprint) (Paperback)

Filesize: 4.34 MB

Reviews

The publication is easy to read through preferable to fully grasp. It is written in simple phrases instead of hard to understand. You will not sense monotony at any moment of your respective time (that's what catalogs are for concerning if you request me).

(Kevin Bergstrom Sr.)

ELECTRIC POWER TRANSMISSION PLANTS AND THE USE OF ELECTRICITY IN MINING: WRITTEN FOR THE TWELFTH REPORT OF THE STATE MINERALOGIST, 1894 (CLASSIC REPRINT) (PAPERBACK)

Brand New Book ***** Print on Demand *****.Excerpt from Electric Power Transmission Plants and the Use of Electricity in Mining: Written for the Twelfth Report of the State Mineralogist, 1894 Some one has aptly spoken of California as the Switzerland of America. Certainly the rugged scenery of its snow-capped Sierra, and its numerous lakes and mountain streams, justify, in part, the simile. In Switzerland they have been quick to realize the advantages to be derived from the utilization of their water powers for the generation of electric power, and its transmission to distant points; here in California, we are but beginning to grasp the situation. In electricity the miner has undoubtedly gained a most efficient and valuable ally. Through its aid the latent power of the many streams now running idly down the mountain slopes can be made available, and brought across long stretches of country by means of a simple line of wire, to operate the machinery of mine and mill. In sections where no water powers are available, and fuel is scarce and dear, electricity may be generated at the center of fuel supply, and the power transmitted from this central station to operate a number of mills and hoisting works in the distant mining camp. One of the great advantages of electric power is its adaptability to ready subdivision into small units without material loss of power, by reason of the high efficiency now developed by the best types of dynamos. Hence, separate motors may be used in the mill for running crushers, stamps, concentrators, pans, etc., or in the mine for hoisting-engines, pumps, and air compressors, effecting a very appreciable saving when any of these machines are idle. To accomplish...
