## PHYSICAL REVIEW VOLUME 24

To get **Physical review Volume 24** PDF, make sure you follow the link listed below and save the ebook or have accessibility to additional information which are in conjunction with PHYSICAL REVIEW VOLUME 24 book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 152 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: . . . at the opening of the main circuit was compared with the quantity discharged from a standard condenser. The resistance of the galvanometer circuit was measured after each set of observations. The coefficients for two coils wound on the same spool were determined; and to test the accuracy of the values obtained, the coefficients of the two placed in series with the currents first in the same and then in opposite directions were determined as was also the coefficient of mutual induction. The following observations were common to all the self-induction determinations: 20. 2 to 20. 3 C. I2 Rt 99. 99 ohms. A 9. 9966 ohms. 3 40. 000 except in case of coil No. 2, where R3 10. 014 ohms. E. M. F. of standard cell on potentiometer 1. 01869 (German) volts. E. M. F. of standard cell used for charging condenser 1. 01883 (German) volts. C 1. 00136 x io-6 farads. Distance of straight scale 127. 2 cm. The remaining data are given in Table I. The lower part of Table I contains the observations necessary, in addition to the above data, for the determination of the coefficient of mutual induction of the two coils. The method used was that employing the relation  $M = QRSP$ , the main and secondary circuits being opened in succession as in the self-induction determinations. The apparatus was arranged as shown in diagram in Fig. 4, the parts serving a similar purpose as those in Fig. 2 are represented by...
