By Dym

Elsevier Science Publishing Co Inc, United States, 2004. Hardback. Book Condition: New. 2nd Revised edition. 228 x 158 mm. Language: English . Brand New Book. The second half demonstrates the latest applications for these tools to a broad variety of subjects, including exponential growth and decay in fields ranging from biology to economics, traffic flow, free and forced vibration of mechanical and other systems, and optimization problems in biology, structures, and social decision making. Prospective students should have already completed courses in elementary algebra, trigonometry, and first-year calculus and have some familiarity...
